For over 50 years, Sidock Architects has been planning and designing, facilities that enrich the lives of the public. Working with hundreds of private and municipal entities, we have successfully planned, created, and/or enhanced, countless projects dedicated to the greater civic good. Our project list includes the expected, such as civic center master plans, city hall complexes, police, fire, judicial, and public works. Beyond, the expected, Sidock Architects has amassed an impressive award winning portfolio of projects that includes community centers, senior centers, performing arts, recreation

centers, historical museums, nature centers, parks, ice arenas, downtown streetscapes and renewal projects, farmers markets, arts centers, libraries, museums, clock towers, petting farms, and metroparks, just to name some. Working closely with civic entities, we have completed new facilities, restorations, adaptive re-uses, renovations, and additions in a manner that satisfied all governmental and public-at-large concerns and needs, and we have completed them within stringent time frames and budgets
