- Life Safety Engineering

For over 50 years, we have been planning and designing facilities that enrich the lives and well being of the public. Working with hundreds of private and municipal entities, we have successfully planned, created, enhanced, and renovated, countless projects dedicated to recreational opportunities. Our project list includes an impressive award winning portfolio of water parks, athletic centers, recreation centers, community centers, senior centers, nature centers, ice arenas, parks, golf courses, petting farms, historical attractions, metroparks, marinas, sports complexes, and

many other private and civic recreational projects. Sidock Architects understands how vital free time is given today's hectic non-stop "connected" lifestyle, and we design facilities to maximize recreational opportunities within our limited down time. Working closely with both private and civic entities, Sidock has completed new facilities, restorations, adaptive re-uses, renovations, and additions in a manner that satisfied all governmental and public-at-large concerns and needs, and we have completed them within stringent time frames and budgets.
